

## FRITZ!Box 6690 Wi-Fi 6

### Modem factory settings

- The modem does not have a built-in reset button, it must be done in the modem administration.

The screenshot shows the web interface of a Fritz!Box 6690 Cable. The top navigation bar is blue with the Fritz! logo on the left, the title 'FRITZ!Box 6690 Cable' in the center, and 'MyFRITZ!' and 'FRITZ!NAS' buttons on the right. A left sidebar contains a menu with icons and labels: Overview, Internet, Telephony, Home Network, Wi-Fi, Smart Home, DVB-C, Diagnostics, System (selected), Event Log, Energy Monitor, Push Service, FRITZ!Box Users, Buttons and LEDs, Region and Language, Backup (highlighted in blue), Wizards, and Help and Info. The main content area has a breadcrumb 'System > Backup' and tabs for 'Save', 'Restore', 'Restart', and 'Factory Settings' (selected). Below the tabs, a message states: 'Here you can restore the factory settings to the FRITZ!Box.' An 'Attention:' section follows with two bullet points: 'All settings you made in the FRITZ!Box are then deleted. Therefore we recommend creating a [backup file](#) before performing a reset.' and 'If you use an individual network key or a special IP configuration, you must change the network settings of your network devices in order to be able to access the FRITZ!Box after performing a reset.' At the bottom right, a red arrow points to a blue button labeled 'Load Factory Settings'.

- Modem administration does not support the Czech language.
- We can get to the factory settings by following these steps:
- In the left column, select **System** → **Backup** → then select **Factory Settings** in the top bar and on the right side of the screen, select **Load Factory Settings**.
