

Compal CH7465

Changing the WiFi name and password

- Enter the address in the internet browser 192.168.0.1 .
- You can switch the settings to Czech at the bottom of the page.
- Enter the password that is shown **on the label** at the bottom of the modem next to "Settings password:"

- Now we will select **Advanced Settings**.
- In the left part, click on **Wireless** and select the **Security** sub-option.
- At this time, you can set WiFi name and password separately for 2.4GHz and 5GHz network.
- We confirm the change by clicking the "Apply changes" button.
- Settings will change within 2 minutes at most.
