# Wi-Fi settings on ZTE MF255V

- We log in to the ZTE MF 255 modem in the same way as we log in to modems from other brands.
- But first we need to be logged in to the Wi-Fi modem.
- We'll show you how to do it in this guide.

We click on the available connections on our computer and according to the label on the modem we find the Wi-Fi name of the modem.

- The Wi-Fi login data can be found at the bottom of the label.

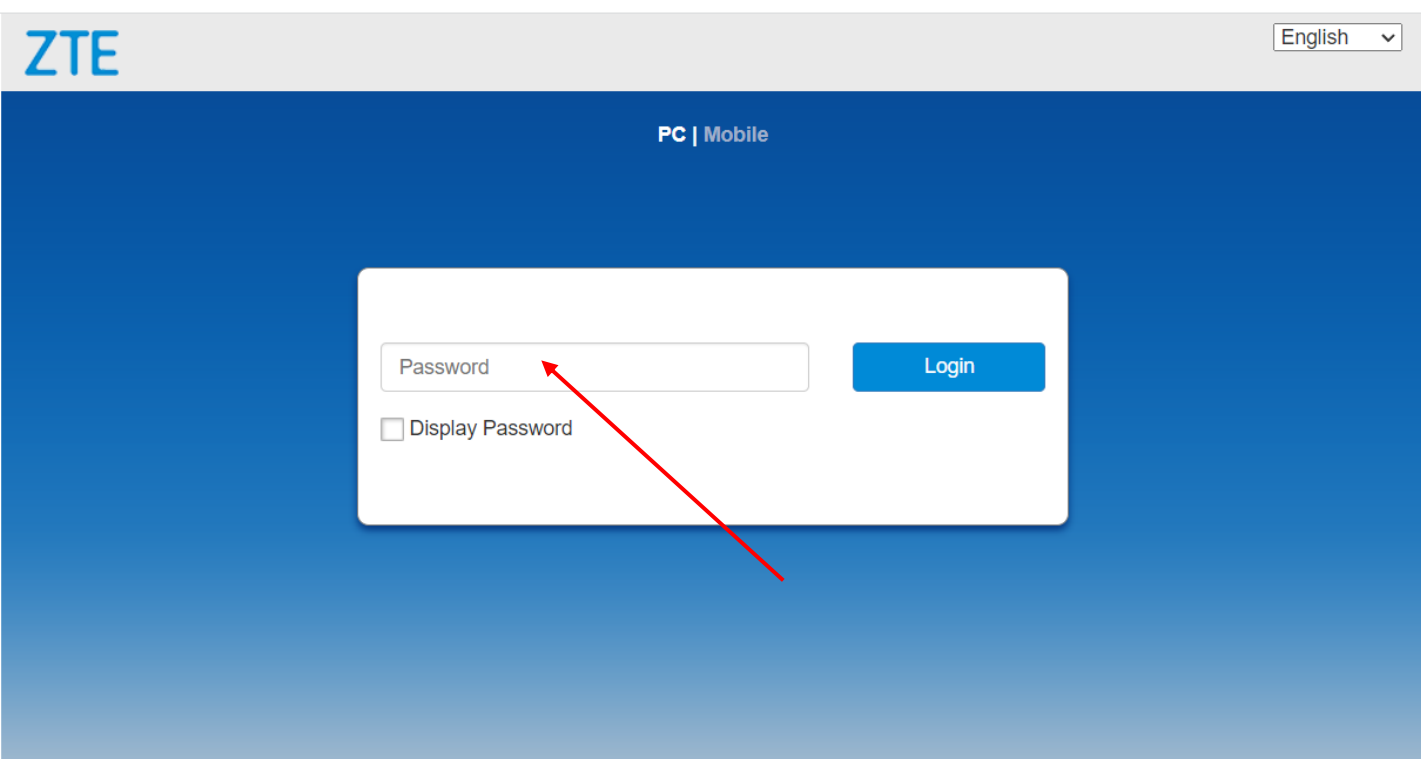

Wi-Fi name
Wi-Fi password

- We open any browser (in which we search for websites) and enter the link to the page 192.168.0.1

192.168.0.1
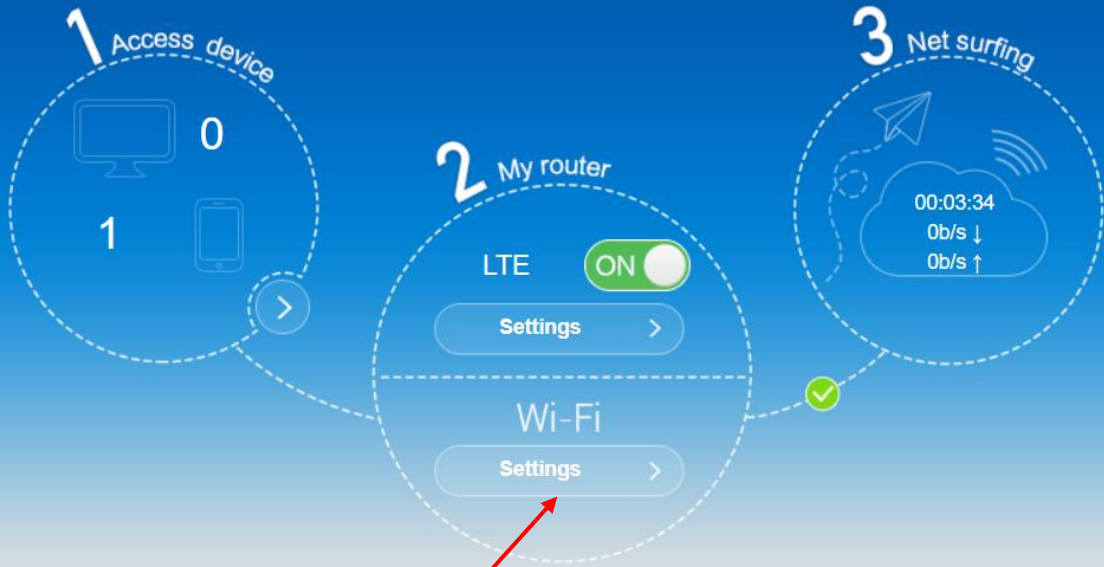

In the upper half of the Google window that is used, we enter this address or click on the address in the top line.

Apply

And we will save via the button apply.

- When we make a mistake or the password is not saved correctly, we have the option to connect the modem to the PC using a LAN cable.
- Here we do not need to use a Wi-Fi password and proceed in the same way.
- Edit the password and save it.
- If we do not have the possibility to use the LAN cable and PC, it is necessary to perform a reset to the factory settings.
- There is a reset button on the back of the modem, hold it with your finger or a suitable tool for at least 15 seconds.
- Then, after loading, we will set up Wi-Fi again.
- There is only 2.4 Ghz band on the ZTE MF255v.
