

Icloud storage settings, channel hiding and general settings information

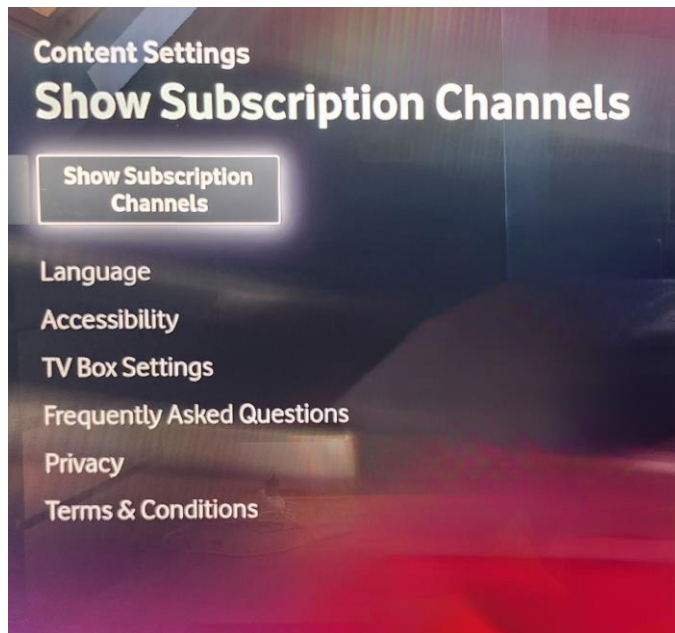

- The next useful function is the display of "**Cloud Recordings**".

- After clicking, you can see how much space is currently used up on the recording storage.
- If the capacity reaches 100% and you still record another show, your oldest recording is automatically deleted to make room for a new one.

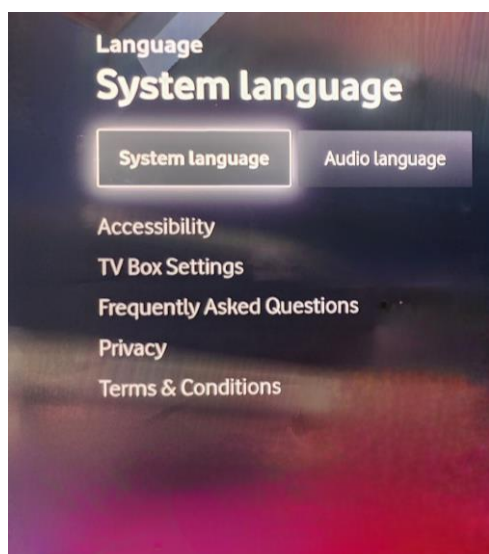

-
- When you go back from the recordings in the Cloud and move the arrow to the right, you will get the option “**Show subscription channels**”.

- The display of channels is used to possibly hide channels that you have not subscribed to.
- Once you hide them, you won't get confused when browsing programs.

-
- Next in order is the "**Language**" setting.
 - Here you can set the English or Czech language.
 - This is followed by "**TV Box Settings**" where you can find information about Vodafone TV.
-

-
- The last useful option you will find in the settings is the "**Frequently Asked Questions**".
 - Here you will find some useful questions about Vodafone TV and their answers.
