

Connection of the classic set-top box

- OTT – **Three cables** must be connected from the back of the set-top box (power, HDMI and ethernet. **See the picture below**).
- VTV-C - **Four cables** (power, HDMI, ethernet and coaxial. **See image below**) must be connected from the back of the set-top box.
- After connecting, the input on the TV must be switched correctly. (On HDMI 1, HDMI 2, etc., It depends to which connector in the TV is HDMI cable plugged into).

- Power supply (connection: set-top box – electrical socket).
- Ethernet cable (connection: set-top box – modem).
- HDMI (connection: set-top box – TV).
- Coaxial cable (connection: set-top box - subscriber socket).
